Derived Score						4.66	4.52	4.23

The Derived Score is the weighted average of Presentation skills, Credible/Knowledgeable, Engaging/Interactive & Avoided Commercialization

Content/Speaker Comments

- Easily the best presentation I've attended this year so far!
- Excellent presentation.
- Fascinating topic with the right balance of functional and technical emphasis.
- Historical references tend to be repetitive in many of the sessions. I left to check out other sessions and returned for the finish of this one, which was outstanding.
- Interesting but too warfare related for what I'm doing for a living in security.
- Liked the organization. Went and bought his book.
- Needed more time for q/a. Terrific speaker!
- One of best sessions I attended so far.
- One of the best of the week.
- Peter is an incredible speaker and thinker. I'm a huge fan and would love to see him back again in the future.
- Scary but excellent info.
- Session is much better when lights are left on. There is more energy and participation. Please keep the lights up.
- Very informative presentation. Changed the way I look at influence of security in geopolitical realm.
- Very interesting opinions and research. Fantastic presentation!

Session Name: EXP-T10 - NextWar: The Future of Technology and Geopolitics   **Total Evaluations:** `43`

Track: Industry Experts

Speaker(s): Peter Singer

- Very interesting talk.
- Very well done presentation. Very engaging. Very patient at the end of his comments - fielded each question with respect - even when it was more of a statement versus question to be answered.
- Whether it plays out or not, the insight into "what might come to be" is amazing.
